

Naga Manasa Bandaru

Software Engineer | Frontend

+1(940)-629-6747 | manasabandaru1435@gmail.com | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with around 4 years of experience delivering scalable, user-focused web applications in enterprise and logistics environments. Specialized in React, Next.js, TypeScript, and modern JavaScript, with demonstrated success in performance optimization, UI scalability, and data-driven feature delivery. Frontend-heavy developer with foundational backend exposure (Node.js, REST APIs, basic Java services) and strong Business Analyst capabilities, including requirements analysis, stakeholder coordination, KPI tracking, and process improvement. Experienced in Agile teams, translating business problems into reliable technical solutions.

TECHNICAL SKILLS

- Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Chart.js, Redux Toolkit, React Query, Tailwind CSS, Material UI, Bootstrap
- Backend:** Node.js, Express.js, Java (basic), Python (basic), RESTful API Design, JWT Authentication, GraphQL, OAuth 2.0
- Databases:** MongoDB, Firebase, MySQL, NoSQL concepts
- Cloud & Deployment:** AWS (EC2, S3, IAM), Docker, GitHub Actions, CI/CD Pipelines, Webpack, npm, yarn, Git
- AI & Developer tools:** Cursor, GitHub Copilot, Windsurf, VS Code, Chrome DevTools, Figma
- Testing & Collaboration Tools:** Jest, React Testing Library, Cypress, Postman, Swagger, Jira, Confluence
- Architecture & Design:** System Design Fundamentals, Scalable, Frontend Architecture

WORK EXPERIENCE

SDE I - Frontend

FedEx | Dallas – Fort Worth, TX | Jan 2025 - Present

- Designed interactive logistics dashboards using React, Next.js, and TypeScript, enabling operational visibility.
- Increased UI responsiveness by 35%+ through rendering optimization, state management, and memoization techniques.
- Partnered with product owners to clarify requirements, refine user stories, and validate acceptance criteria effectively.
- Connected frontend systems with REST and GraphQL APIs, ensuring secure, consistent, scalable data flow across services.
- Introduced reusable UI patterns that shortened feature development cycles by 30% and improved code maintainability.
- Contributed to sprint planning, issue triage, and delivery tracking to improve release predictability and team velocity.

Frontend Developer

Dell Technologies | Jan 2022 - Dec 2023 | Hyderabad, India

- Developed scalable enterprise web interfaces using React, Next.js, and TypeScript, supporting business workflows.
- Improved application performance through server-side rendering and optimized component lifecycles efficiently.
- Supported Agile delivery through sprint execution, bug resolution, and continuous UI enhancements efficiently.
- Collaborated with designers and stakeholders to translate business requirements into accessible user interfaces.
- Standardized UI components and styling systems, reducing development effort and improving visual consistency.
- Integrated frontend modules with REST APIs and authentication flows, ensuring secure and reliable data handling.

Full-Stack Developer

Ojascore Solutions | Mar 2021 – Dec 2021 | Hyderabad, India

- Supported delivery through testing assistance, documentation updates, and production issue resolution efficiently.
- Improved application stability through modular component design and optimized state handling efficiently.
- Implemented JWT-based authentication and REST APIs, ensuring secure, controlled, and compliant data access.
- Collaborated with clients to gather detailed requirements and translate them into functional UI features effectively.
- Enhanced application performance by optimizing API usage and frontend rendering workflows consistently.
- Built client-facing web applications using React and Node.js, supporting scalable business-driven product requirements.

EDUCATION

UNIVERSITY OF TEXAS AT ARLINGTON – M.S. Computer Science | 2024 - 2025

VIGNAN'S INSTITUTE OF ENGINEERING FOR WOMEN – B. Tech Information Technology | 2018 - 2022

PROJECTS

SmartTrack – Real-Time Delivery Analytics Platform: Developed a real-time delivery analytics platform using React to provide clear operational visibility and actionable delivery insights. Built supporting backend services with Node.js and REST APIs, enabling secure data processing and seamless system integration. Implemented AWS-based infrastructure to support scalable deployments and reliable data handling workflows across environments. Optimized data flow and frontend rendering logic to improve dashboard responsiveness and overall application performance.

EduMentor – Learning & Assessment Platform: Designed interactive learning dashboards using React to support student progress tracking and performance analysis. Integrated backend APIs to enable secure data exchange and assessment-related workflows throughout the platform. Implemented role-based views and analytics to effectively support both instructors and learners. Enhanced overall usability through iterative UI improvements driven by user feedback and usage insights.

ACCOMPLISHMENTS

- Drove up to 40% improvement in frontend performance through rendering optimization and efficient state management.
- Reduced feature delivery timelines by 30% by introducing reusable UI patterns and standardized frontend architecture.
- Translated complex business and requirements into scalable technical solutions, improving stakeholder satisfaction.
- Contributed to predictable Agile delivery through effective sprint planning, issue triage, and cross-team collaboration.
